Problems

> Problem 1

Stretching of chains causes problems on take up system on chain synchronics.

> Problem 2

If a jam occurs the rubber will come and some customers like the fact that they can put the rubber back on but it is time consuming which mean lost production time.

Solutions

> Solution 1

uni-chains use Wippermann or Renold brands only. High quality European brands. (no chains from China like the competition). Huge cost saving for the customer.

> Solution 2

uni-chains grippers are molded to the plastic link and do not come off during a jam.
